

# Comments and Suggestions

**Successful GRP Deployment = Reduce potential for adverse wildlife, environmental, and economic impacts.**

An aerial photograph of a waterfront town. A large body of water, likely a river or bay, dominates the left side of the image. A bridge spans across the water in the middle ground. The town is built along the shoreline, with numerous buildings, parking lots, and a marina filled with boats. The background shows a hilly landscape under a clear blue sky.

# Project Timeline:

April - Kick-off Meeting

May/June - Final Site Selection and Field Surveys

July - First Draft of NSGRPs Completed

August - Project Team Members Review NSGRPs

September - Final Review Meeting

October - NSGRPs Published (Final Draft)

November - Present NSGRPs to Area Committee
